Chilled Water for Concrete

AIR COOLED WATER CHILLERS

INFERN-O-THERM QUALITY FOR CONCRETE COOLING

- Capacity ranging from 15 to 70 tons
- Cabinet construction Designed for field service with removable panels
- Dual accessible, semi-hermetic compressors
- Circulating pump with electric starter
- State of the art heat exchanger tube maximizes heat transfer efficiency
- Horizontal construction requires minimum amount of space

40 Ton Infern-O-Therm Chiller w/ 10,000 gal Vertical Storage Tank

30,000 gal portable chiller unit with 80 ton chiller
